

Dipankar Shaw

+91 6290615426 | Kolkata, West Bengal | dipankar@dshaw.dev

Professional Profile: Full-Stack Developer with proven experience architecting and deploying production-ready applications. Skilled in developing robust REST APIs using Express.js alongside modern frameworks like Vue.js and Astro. Startup-tested with hands-on experience across diverse infrastructure, from Node.js to serverless ecosystems. Seeking to bring versatile engineering skills and a track record of production ownership to a full-time role.

Experiences:

Full-Stack Developer Intern | Wiseboxs Technologies (September 2025 – June 2026)

- **Architected and deployed** core features, managing end-to-end frontend and backend development.
- **Developed dynamic, responsive UIs** using modern frameworks, ensuring seamless backend integration.
- **Engineered robust REST APIs** using **Express.js** and **Node.js**, optimizing database queries.
- **Managed complex codebases independently** in a fast-paced environment, pushing stable code to production.

Technical Skills:

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL, Python.
- **Frontend Development:** Vue.js, React, Astro, React Native.
- **Backend & APIs:** Node.js, Express.js, Hono, GraphQL, Serverless, Python FastAPI
- **Cloud & Infrastructure:** Cloudflare Ecosystem (Workers, Pages, D1, R2), Traditional Hosting.
- **Databases & Tools:** PostgreSQL/SQLite, Git/GitHub, JSON-LD / SEO Schema, Linux.

Personal Projects:

Craft-o-Card (Business Portfolio + E-Commerce Application) | *Vue.js, Tailwind CSS, SEO Schema, Hono, R2*

- **Developed a full-scale commercial web application** for a custom design business from requirements to public launch.
- **Utilized Vue.js** to build an interactive and visually pleasing UI.
- **Integrated structured data (JSON-LD)** and sitelink schemas, significantly optimizing search engine visibility.
- **Configured automated deployment pipelines** and custom routing to ensure 100% uptime for client operations.
- *Live Project:* craftocard.in

Nexrepo (Automated Git Backup Utility) | *Vue.js, Astro, Tailwind CSS, Hono, Github API, OAuth*

- **Built an automated disaster recovery tool** to continuously backup repositories from GitHub to private cloud storage.
- **Integrated GitHub REST and Webhook APIs** to trigger real-time, delta-based backup sequences upon new commits.
- **Architected a secure OAuth pipeline** to manage user scopes and permissions without storing sensitive credentials.
- **Implemented custom storage adapters** ensuring absolute data sovereignty across independent object storage providers.
- *Live Project:* nexrepo.qzz.io

Education

Master of Computer Application (MCA) | RERF Group of Institutes (under MAKAUT) | Expected 2026
